

**Question 15: Why isn't this route being designated as an industrial use highway per 17 AAC 35?**

**Answer:** Industrial use highways may be designated under [17 AAC 35.010](#) at DOT&PF's discretion when it receives a petition from an interested party, and has not received such a petition. There is no requirement for anyone to submit a petition, and the designation only has an impact when a user intends to haul loads that do generally do not meet requirements of [17 AAC 25](#) . If a road is designated as an industrial use highway, it would apply to all such users.
