

Rep. Don Young  @repdonyoung · Sep 29, 2020

...

BREAKING: At my request, President [@realDonaldTrump](#) has officially signed the Presidential Permit authorizing the construction of the Alaska to Alberta (A2A) railroad! A2A rail links Alaska to Alberta, Canada, with the goal of transporting oil, minerals, and other commodities.

...

The A2A project represents tremendous potential, not only for our economy but for the delivery of affordable energy for American families. I have been an outspoken supporter of this project because it means good-paying jobs for Alaskans.

...

I will continue to support A2A to its completion, and will be doing everything within my power to cut through red tape and bureaucracy. I have always said that in Congress, relationships are important.
